

CRAZY WEATHER

Site Plan

Jose Concha
CIT230-13

Overview

Site Purpose

The site purpose is to inform the community about the weather forecast easily to help people to schedule their activities and plan for outdoor activities if they desire too. Also provides information to the farmers in the area so they can plan when to plant, watering and perform the tasks required by their crops.

Target Audience

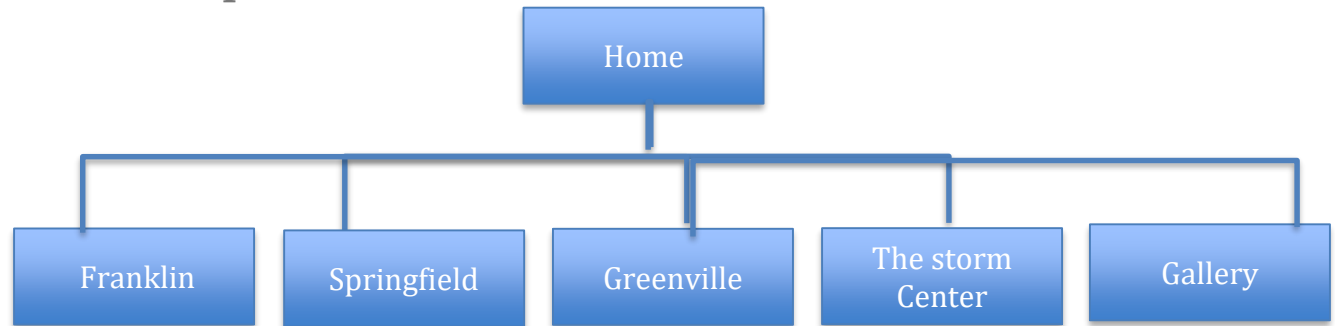

My main target audience are adults, because rarely teenagers or kids care about raining. So the site needs to be neat and clear to match with our audience.

The site is mostly for farmers, parents, agriculture enthusiasts, people with health situations that need sun, cold or rain care.
